The Minnesota Zoological Gardens (MZG) proposes continued maintenance of two non-releasable Hawaiian monk seals for enhancement purposes. These animals would be provided with daily husbandry care and treatment for current medical conditions, routine veterinary care, and would be made available for opportunistic research. MZG will continue public awareness through education and observation, and non-intrusive husbandry and medical studies conducted incidental to the routine care and husbandry of the animals. The permit is requested for the maximum 5-year period.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.
